V683–V685: controlled information test, rejected repair, and exact terminal failure attribution
Exact current state is insufficient here
V680 causal baseline
V683 exact-current diagnostic
Arrival floor
Goal distance (m)
Simulated time (s)
All18 rejected by the dynamic outer set
Original future motion outer set
Known static geometry
Actual future (evaluator only)
Unchanged admission floor
Minimum predicted clearance (m)
Original candidate index (no new search)
Ideal target repair had no registered increment
Original proposal
Consistent turning-circle target
245: no safe nominal input
Contour +0.2 heading error
Locked old decision
