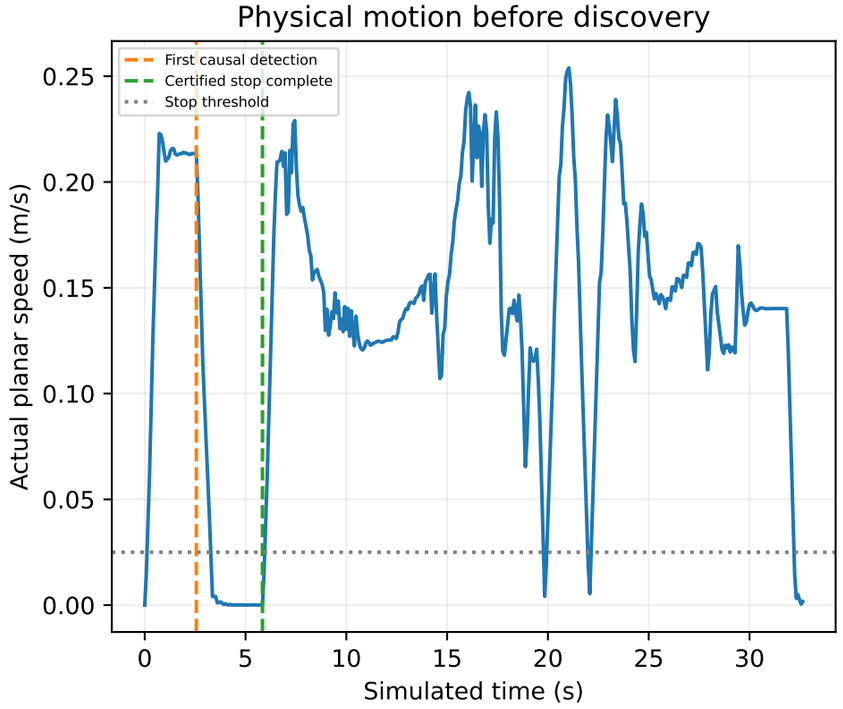
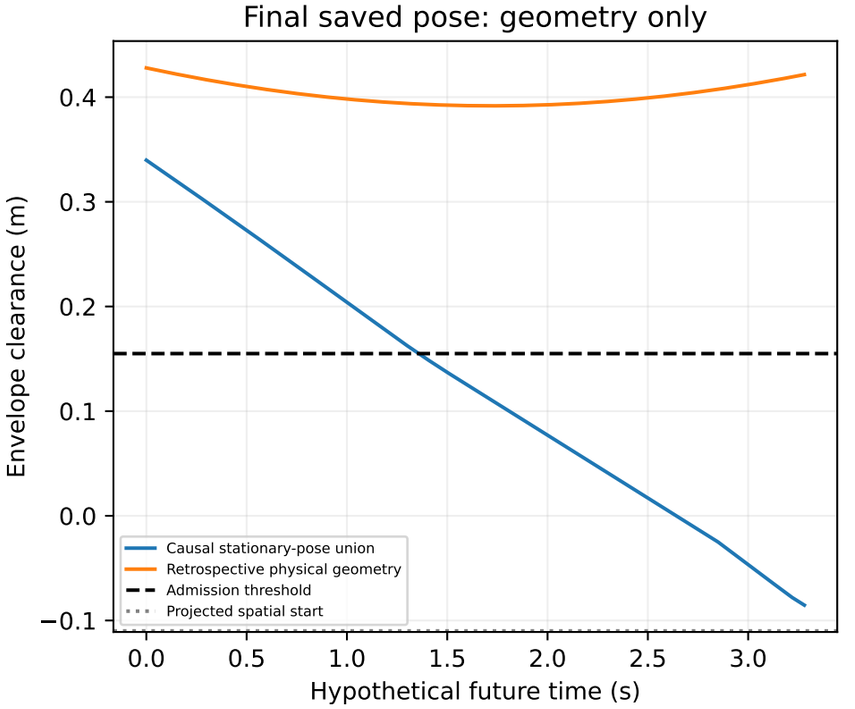
Detected, stopped, replanned; not arrived
Actual executed
Post-stop reference
Start / goal
Final non-arrival
Actor center sweep
y (m)
x (m)



Physical motion before discovery
First causal detection
Certified stop complete
Stop threshold
Actual planar speed (m/s)
Simulated time (s)



Final saved pose: geometry only
Causal stationary-pose union
Retrospective physical geometry
Admission threshold
Projected spatial start
Envelope clearance (m)
Hypothetical future time (s)
