Dynamic unknown obstacle | diameter 0.20 m, amplitude 0.25 m, vmax 0.08 m/s | development only
Interaction area; goal y = -2.959 m is below this zoom
y (m)
x (m)
Full actor sweep
Offline full-sweep bypass
Dense search edges (not arrived)
First-hit constraints (not arrived)
Retained recovery tail (not arrived)
All three development branches did not arrive
Goal distance (m)
Simulation time (s)
Dense search edges
First-hit constraints
Retained recovery tail
Executed recovery tail (3.2 s)
All native ticks; hard floor 0.15 m
Actual full-body clearance (m)
Simulation time (s)
Safe stopping did not renew sufficient observation
Position interval area (m²)
Valid unknown returns per decision
Simulation time (s)
Position interval area
Executed recovery tail (3.2 s)
